## PROFESSIONAL SUMMARY

Computer Science & Engineering graduate (B.Tech, **9.1/10.0 CGPA**) with strong conceptual and practical grounding in low-level system programming, algorithm design, discrete mathematics, and Linux system administration. Secured **All India Rank 2098** (GATE Score: 644/1000) out of **211,020 national candidates** in **GATE 2026 (CS & IT)** and **AIR 392** in **IIITH PGEE**. Experienced in writing memory-efficient C applications, developing custom browser extensions (Manifest V3), automating workflows on Fedora Linux Workstation via Python & Shell scripts, and building cloud automation pipelines.

## EDUCATION & ACADEMIC BACKGROUND

### Rajasthan Technical University

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Aug 2022 -- May 2026

**CGPA: 9.1 / 10.0**

- **Relevant Coursework:** Data Structures & Algorithms, Discrete Mathematics, Operating Systems, DBMS, Computer Networks, System Programming, Microprocessors, Linear Algebra, Abstract Algebra (Group Theory).

## COMPETITIVE EXAMINATIONS & VERIFIED SCORECARDS

- **GATE 2026 (Computer Science & Information Technology):**
  - **All India Rank: 2098** out of **211,020 registered candidates** (Top 0.99% nationwide) | **GATE Score: 644 / 1000**.
  - Demonstrated comprehensive problem-solving mastery across core Computer Science disciplines. (**Official Scorecard Attached**).
- **IIITH PGEE (IIIT Hyderabad Postgraduate Entrance Exam):**
  - **All India Rank: 392** nationwide out of 10,000–15,000 post-graduate engineering candidates.

## INDUSTRY CERTIFICATIONS & PROFESSIONAL CREDENTIALS

- **NPTEL National Elite Certifications (MoE, Govt. of India):**
  - **Programming in Java:** Awarded **Elite Certificate** with **80% Score** | Top performer out of 14,693 candidates (Jan–Apr 2024).
  - **Problem Solving Through Programming in C:** Awarded **Elite Certificate** with **73% Score** out of 3,749 candidates (Jan–Apr 2023).
  - **Programming in Modern C++:** Awarded **61% Score** | 12-week course covering C++ specifications & STL (Jul–Oct 2023).
- **Salesforce Professional Certifications:**
  - **Salesforce Certified AI Associate** (Credential ID: 6127333) & **Salesforce Certified Associate** (Credential ID: 6030076) (2025).
- **LinkedIn Learning & Coursework:**
  - **Building with Google Gemini (Advanced & Ultra) & Raspberry Pi Essential Training (IoT)** — LinkedIn Learning (2025).
  - **C Programming For Beginners – Master the C Language:** Udemy (25.5 hours) | **HACK-AIETM-2024 Participation** (May 2024).

## DETAILED TECHNICAL SKILLS & PRACTICAL USAGE

- **Discrete & Foundational Mathematics:** Deep problem-solving mastery in **Discrete Mathematics** (Logic, Calculus, Set Theory, Combinatorics, Graph Theory, Recurrence Relations), **Linear Algebra**, and **Group Theory**.
- **C & Modern C++:** Object-Oriented Programming (OOP) paradigms, manual memory management (`malloc/free`, pointers, stack allocation), templates, custom data structure engines (Infix-to-Postfix conversion, evaluation stack), and Sudoku solver engine.
- **Python & Automation Scripting:** Standard library, file I/O, regex, JSON parsing, PyDrive/Google Drive API integration, Telegram Bot API. Built cloud pipelines (`telegram-to-drive`), web scrapers (BeautifulSoup), logic tools, and task CLI utilities.
- **Browser Extension Engineering (Manifest V3 & JavaScript):** Developed custom Chromium extensions (`ytmaster` / `FocusTube`, `webtools`) for hotkey search focusing, image search redirects, and zero-flicker video UI modification.

- **Linux Systems Administration & Fedora Workstation:** Operating **Fedora Linux Workstation** as primary OS. Custom Bash scripts, cron jobs, zsh workflows, Vim/Emacs modal editing configs, dotfiles management (skc-coder/.dotfiles).
- **Database Management & SQL:** RDBMS fundamentals, ER modeling, Normalization (1NF to 3NF/BCNF), Relational Algebra, ACID properties, basic SQL queries (JOINS, subqueries).

## KEY ENGINEERING & TECHNICAL PROJECTS

---

### GATE Exam Mock Test Interface & Portal Engine

[github.com/skc-coder/gate-core](https://github.com/skc-coder/gate-core)

Web Application | JavaScript, HTML5, Local Test Engine

- Built a custom offline-first mock test interface mirroring the official GATE examination environment for personal exam simulation.
- Implemented interactive virtual keypad controls, question status navigation palette, countdown timer management, and real-time score analytics.

### Automated Test Series Data Pipeline & Archival Engine

[github.com/skc-coder/testseries\\_data](https://github.com/skc-coder/testseries_data)

Data Engineering & Archival | Python, JSON Data Pipeline

- Developed an automated data extraction and JSON indexing pipeline to structure and archive practice test content for offline revision.

### PyQHub -- University Semester PYQ Repository Platform

[github.com/skc-coder/pyqhub](https://github.com/skc-coder/pyqhub)

Web Application | TypeScript, Web Architecture

- Developed a web repository platform to accumulate, organize, and search previous year semester exam papers across technical universities (RTU, AKTU, and others).

### WebTools Browser Extension

[github.com/skc-coder/webtools](https://github.com/skc-coder/webtools)

Chrome Extension | Manifest V3, JavaScript, Chrome Extension API

- Engineered a Manifest V3 Chromium browser extension featuring global hotkey search bar focusing ('/' shortcut) and automatic Brave to Google Images redirection.

### FocusTube (YT Master) Distraction-Free Extension

[github.com/skc-coder/ytmaster](https://github.com/skc-coder/ytmaster)

Chrome Extension | JavaScript, DOM Manipulation, YouTube API

- Built a specialized YouTube productivity extension to eliminate recommendation algorithms, hide feed clutter, and toggle UI elements using Content Scripts at document\_start.

### Telegram to Google Drive Automated Cloud Pipeline

[github.com/skc-coder/telegram-to-drive](https://github.com/skc-coder/telegram-to-drive)

Cloud Automation & System Scripting | Python, Telegram API, PyDrive

- Architected an automated cloud ingestion pipeline in **Python** that intercepts media files from Telegram channels and streams them directly into **Google Drive** storage using OAuth2 and PyDrive API.

### Infix to Postfix Converter & Expression Calculator Engine

[github.com/skc-coder/Infix-to-postfix-and-calculator](https://github.com/skc-coder/Infix-to-postfix-and-calculator)

Systems & Data Structures | C Language, Memory Management

- Designed and implemented a low-level mathematical expression parsing engine in **C** that converts Infix expressions to Postfix using custom Stack structures.

### Boolean Truth Table & Logic Gate Generator

[github.com/skc-coder/truth-table](https://github.com/skc-coder/truth-table)

Computer Logic & Discrete Math | Python, Logic Gates

- Developed an automated Boolean logic truth table evaluator parsing arbitrary logical expressions across all  $2^n$  variable combinations.

### Sudoku Solver Engine

[github.com/skc-coder/Sudoku-Solver](https://github.com/skc-coder/Sudoku-Solver)

Algorithms & Backtracking | C++, Constraint Satisfaction

- Built an efficient  $9 \times 9$  Sudoku puzzle solver using recursive **Backtracking** algorithms and constraint satisfaction logic in **C++**.

### Fedora Linux Dotfiles & System Workflows

[github.com/skc-coder/.dotfiles](https://github.com/skc-coder/.dotfiles)

DevOps & System Configuration | Bash, Shell, Custom Configs

- Maintained a modular repository of personal **Fedora Linux Workstation** dotfiles, shell aliases, Vim/Emacs configurations, desktop environment settings, and custom terminal shortcuts.
